## B & V Water Treatment's Revolutionary Showerhead Cleaner

Multitreat SHD is the unique, easy-to-use showerhead de-scaler and disinfectant from B & V Water Treatment. Described as a 'revelation', it eliminates the need for laborious cleaning and cuts out corrosion problems. Proven to prevent the growth of legionella, this is a showerhead cleaner that has everything, all while taking just a few minutes to use.

We have had independent efficiency tests, customer comments and laboratory results to prove that Multitreat SHD prevents the growth of legionella. For our customers, that means peace-of-mind, as legionella can be a serious problem in showerheads.

Showers deliver water at around 45°C, making them a perfect place for bacteria to grow. Because showers are used sporadically, long periods of stagnation give the bacteria chance to multiply, and showerheads act as filters, trapping debris and scale – the two things that act as a nutrient and a safe habitat for bacteria. It is therefore vital that showers are cleaned on a regular basis.

For hard water areas where scale is a visible problem on showerheads, Multitreat SHD should be used neat. A maximum dilution of 1: 3 with water can be used in soft water areas and where no scale can be seen on or in the fitting to be cleaned. Previous techniques for descaling and sanitising showerheads involved a long period of immersion in acid, followed by disinfection in a chlorine solution. Using Multitreat SHD to clean showerheads produces the same results but is much easier and quicker to use. The obvious health and safety risks involved with the possible mixing of acid and chlorine are also avoided when Multitreat SHD is used.

We also have Multitreat SHD (Indicator), which does exactly the same as Multitreat SHD, but is self-indicating. It contains a pH indicator to show when the acidity of a product is depleted.

Kieran Farmer from Northampton Town Football Club says:

*"We recognise the vital importance of keeping our showerheads spotlessly clean to minimise health risks. In the past, this has proved a time-consuming and difficult task, as we have been using the traditional chlorine-based products, plus a de-scaler.*

*"We cannot believe the difference now that we are using B & V's Multitreat SHD.*

*"It is a revelation! It is so easy to use that showerheads can be thoroughly cleaned within minutes with fantastic results. There are no horrible smells and our shower equipment is no longer suffering from damage from harsh products.*

*"We are over the moon with this product and will continue to use it in the future."*

One of our technicians, Martin Joyce, has also been praising Multitreat SHD:

*"I was recently on site and cleaned 98 showers in one day. That would never have been possible using traditional methods. And, at the end of the day, it saves the customer money."*
